ABGB 47/63  19 March 1963  Copy #2 of 4  EMORANDUM FOR: Chief, Military Division, OCI  TTENTION:  EMOM: Chief, CLA/FID(NFIC)  UBJECT: Area Search - Chiu Ch'uan, China  EFERENCES: Requirement No. OSI/R-15/63  CIA Project No. C 308/63  1. As requested, a search was made of the area between O2 and 105 east longitude, and between 41 and 55 north latitude and the ongolian border for any evidence of atomic weapons testing facilities. The most current thotographic coverage of the area used in the search is which is of good quality and completely covers the area. Other previous missions partially cover the rea and were also checked.  2. In the area searched there is no evidence of atomic eapons testing or test facilities nor is there any evidence of any unusual civity, housing and support installations which would indicate that tomic testing facilities are being constructed. There are two military yee establishments nearby which could be used as housing for workers and schnicians. One is located approximately fifty nautical miles (nm) ESE of the search area and the other which has a landing strip is located permaniately cixty m EW of the area. However, these military establishments ould be associated with the Shuang-Ch'en-Tau Missile Center (41-05N 100-15E) mich is located ninety nm SW of the area searched. (See NFIC/R-36/62)  4. The photo analysts on this project are Messrs.  hould be associated with the Shuang-Ch'en-Tau Missile Center (41-05N 100-15E) mich is located ninety nm SW of the area searched. (See NFIC/R-36/62)		or Reléase 2004/07/07 : CIA-RDP78T
